EXPERIENCE

IT Admin Support - Contractual, Project Base
Outsource: Ascendion
Client: City Savings Bank, CSB

Ortigas Center, Pasig City, Metro Manila
March 2024 – January 2025

- The deployment of Project Genesis, a state-of-the-art queuing system leveraging iPads and large screens for real-time customer tracking, across 15+ branches, boosting operational efficiency by 30% and significantly enhancing customer satisfaction.
- Diagnosed and resolved technical issues across 50+ units during a high-priority CrowdStrike incident, restoring full system functionality within a single day, reducing downtime by 80%, and safeguarding critical data integrity.

Reason for Leaving

- I have completed my contract and am now seeking opportunities to advance my career in programming. I'm eager to apply the skills and experience I've gained to contribute to a dynamic team, take on new challenges, and continue growing both technically and professionally.

Software Developer – Freelance
Working Student

Work From Home
October 2022 – March 2023

- Designed, developed, and maintained custom software solutions for diverse clients, delivering high-quality, scalable applications on schedule, which improved client operations by streamlining key processes.
- Successfully collaborated with clients to gather detailed requirements, ensuring alignment with their business objectives, and delivered tailored solutions that exceeded expectations, including a fully functional system that was implemented and met all performance metrics.
- Independently managed multiple projects from conception to completion, meeting deadlines while maintaining clear and effective communication with clients, fostering long-term professional relationships.

Reason for Leaving

- I decided to transition from freelance work because I found it challenging to maintain a consistent stream of clients. Most of the projects I received were seasonal or short-term, such as assisting with capstone projects, which made it difficult to sustain long-term stability. I'm now seeking a more structured and steady opportunity where I can grow professionally and contribute to a team environment.

SKILLS AND INTERESTS

Technical Skills

- Programming Languages:** Java, C#, C++, Python, JavaScript, PHP, VB.NET, HTML/CSS
- Frameworks & Runtimes:** Node.js, Express.js, Laravel
- Databases:** MySQL, SQLite, Firebase Realtime Database
- Tools & Platforms:** GitHub, Firebase Console, Unity, Blender, Visual Studio, Visual Studio Code, XAMPP

Interests

- I'm always exploring new technologies and coding techniques, keeping an open mindset for learning, and adapting to different development environments.
- I design and develop immersive games in Unity, specializing in 3D environments and gameplay mechanics, combining creativity with technical expertise.

EDUCATION

Taguig City University
Batchelor of Science in Computer Science

2019 – 2023
